

Today's

HEALTHY CHOICE

Nature and science have come together to bring this huge evolution in disposable products, ranging from sanitary napkins to diapers.

-100% biodegradable

-Super absorbent technology that stays dry.

Benefits have been reported in: ovarian cysts, yeast infection, uterine fibroids, hormonal imbalance, irregular cycle, bladder infection, bladder control, reduced cramping, reduced bloating, hemorrhoids, colon bleeding, and prostate health.

What others are saying...

My periods are very heavy and I need to wear 2 or 3 pads at a time. I was able to use 1 pad and not leak. D.G Medicine Hat, AB

I am trying not to use tampons because of the links with dioxins and cancer. Using the Anion product is definitely helping with the comfort level. My PMS symptoms are not as severe and there is virtually no odor. C Invermere, BC

I hardly know that I am at that time of month. My energy stays with me all day, and I am completely pain free. I will never go back to using tampons or regular pads. For the health of all women I am happy to share the word about these wonderful pads. Amanda Lethbridge AB

Breakthrough in healthcare and technology

**that has been kept
a secret until
now...**

**“Products that Millions of
people have to buy no
matter what the economy
is doing.”**
